

Empowering Educators to Teach Cyber

The goal of CYBER.ORG is to empower educators as they prepare the next generation to succeed in the cyber workforce of tomorrow.

CYBER.ORG provides educators and caregivers with the curricula and resources needed to deliver industry-leading cybersecurity content to K-12 students. Educators can access in-person, virtual, or self-paced professional development (PD) to facilitate the integration of cybersecurity education into their classrooms. Using the secure, virtual environments of the CYBER.ORG Range, students can practice real-world cybersecurity skills and experience simulated cyber attacks.

Supported by a grant through the Cybersecurity Infrastructure and Security Agency (CISA), CYBER.ORG is able to offer these resources at no-cost across the U.S.

- Partnered with:
 - Cyber San Bernardino
 - Cypress Community College
 - Glendale Community College
 - Palo Alto Networks
 - Parallax, Inc.
 - San Geronio Girl Scout Council

“CYBER.ORG curriculum is the lifeline for our Career and Technical Education Cyber Academic Pathway instructors! When our program began 10 years ago, there were little to no solid curriculum resources. CYBER.ORG has provided rich technical content, engaging lessons, and a solid systematic lesson system that eases the concerns for even our newest cyber instructors.
