

Empowering Educators to Teach Cyber

The goal of CYBER.ORG is to empower educators as they prepare the next generation to succeed in the cyber workforce of tomorrow.

CYBER.ORG provides educators and caregivers with the curricula and resources needed to deliver industry-leading cybersecurity content to K-12 students. Educators can access in-person, virtual, or self-paced professional development (PD) to facilitate the integration of cybersecurity education into their classrooms. Using the secure, virtual environments of the CYBER.ORG Range, students can practice real-world cybersecurity skills and experience simulated cyber attacks.

Supported by a grant through the Cybersecurity Infrastructure and Security Agency (CISA), CYBER.ORG is able to offer these resources at no-cost across the U.S.

- Hosted:
 - West Palm Beach Career and Technical Education events
 - CYBER.ORG National Conference (2024)
 - Palm Beach School District Capture The Flag competition (2024)
- Presented at:
 - Broward and Putnam County Schools CS Festival (2024)
 - Cyber FL Putts and PD (2022, 2024)
 - Computer Science Teacher Association Broward/PBC Chapter (2024)
- Partnered with:
 - Broward County School District
 - Cyber Florida
 - Duval County School District
 - Palm Beach County Schools
 - Putnam County School District

“CYBER.ORG provides one of the best curricula for learning cybersecurity, offering resources unlike anything else available. The lessons and cyber range simplify complex topics, making them more accessible and helping students build a deeper understanding of the field.

-Angelo Angione
