

Empowering Educators to Teach Cyber

The goal of CYBER.ORG is to empower educators as they prepare the next generation to succeed in the cyber workforce of tomorrow.

CYBER.ORG provides educators and caregivers with the curricula and resources needed to deliver industry-leading cybersecurity content to K-12 students. Educators can access in-person, virtual, or self-paced professional development (PD) to facilitate the integration of cybersecurity education into their classrooms. Using the secure, virtual environments of the CYBER.ORG Range, students can practice real-world cybersecurity skills and experience simulated cyber attacks.

Supported by a grant through the Cybersecurity Infrastructure and Security Agency (CISA), CYBER.ORG is able to offer these resources at no-cost across the U.S.

Taking a closer look at CYBER.ORG activity in

Nebraska

- Hosted CYBER.ORG National Conference (2018)
- Presented at:
 - Nebraska Transition Conference (2022)
 - Nebraska Career and Technical Education Conference (2022)
 - Nebraska Association for Career and Technical Education Conference (2024)

“ I have been a long-time fan of CYBER.ORG’s resources, utilizing their curriculum across multiple classes since their days as NICERC. Their high-quality materials are consistently reliable, and their team is always available to provide support whenever challenges arise. They also offer frequent professional development opportunities and maintain multiple channels for engaging directly with their curriculum writers.
