

Empowering Educators to Teach Cyber

The goal of CYBER.ORG is to empower educators as they prepare the next generation to succeed in the cyber workforce of tomorrow.

CYBER.ORG provides educators and caregivers with the curricula and resources needed to deliver industry-leading cybersecurity content to K-12 students. Educators can access in-person, virtual, or self-paced professional development (PD) to facilitate the integration of cybersecurity education into their classrooms. Using the secure, virtual environments of the CYBER.ORG Range, students can practice real-world cybersecurity skills and experience simulated cyber attacks.

Supported by a grant through the Cybersecurity Infrastructure and Security Agency (CISA), CYBER.ORG is able to offer these resources at no-cost across the U.S.

Taking a closer look at CYBER.ORG activity in Texas

Texas

- Partnered with The University of Texas at Austin’s Texas Advanced Computing Center for Train-the-Trainer
- Presented at:
 - NICE Conference (2024)
 - NICE K-12 Conference (2024)
 - Association for Career and Technical Education Career Tech Vision (2024)
 - WeTeachCS Summit (2024)
 - Texas Computer Education Association Area 1 EdTech Conference (2023)

“The resources provided by CYBER.ORG have been invaluable in my classroom. With lesson plans available in both English and Spanish, I can cater to a diverse group of students, ensuring that everyone has access to a quality education in cybersecurity. As a rookie teacher in cybersecurity, I found that I did not need to reinvent the wheel; the comprehensive lessons offered are incredibly helpful and easy to implement.
