

Empowering Educators to Teach Cyber

The goal of CYBER.ORG is to empower educators as they prepare the next generation to succeed in the cyber workforce of tomorrow.

CYBER.ORG provides educators and caregivers with the curricula and resources needed to deliver industry-leading cybersecurity content to K-12 students. Educators can access in-person, virtual, or self-paced professional development (PD) to facilitate the integration of cybersecurity education into their classrooms. Using the secure, virtual environments of the CYBER.ORG Range, students can practice real-world cybersecurity skills and experience simulated cyber attacks.

Supported by a grant through the Cybersecurity Infrastructure and Security Agency (CISA), CYBER.ORG is able to offer these resources at no-cost across the U.S.

Taking a closer look at CYBER.ORG activity in

Wyoming

- Hosted PD for Sublette County School District 9 (Big Piney)
- Presented at:
 - Wyoming Computer Science Education Conference (2022)
 - Wyoming Association for Career and Technical Education Conference (2024)

“CYBER.ORG’s 9-12 cybersecurity curriculum has been the cornerstone of my upper-level cybersecurity course for the past two years. This free, comprehensive resource allows me to prepare students for an industry-recognized credential and provides them with real-world learning opportunities that are essential for success in today’s ever-evolving tech landscape. I truly feel this curriculum helps me ensure college and career readiness in my students.
